

One-on-One coaching help is for you to improve your skills and your impact. In your role (as a future or current leader, continual improvement practitioner, or individual performer), coaching helps provide advice and guidance in a confidential, objective, and one-on-one fashion.

Approach

The structure is 2 hours per month via calls, email, and face to face (if possible). You raise the topic of focus and together we work through obstacles, actions, and results. However, if you run into something of a daily nature, give us a call or email. We provide guidance and advice, on the spot education, access to informative articles and templates to use, and a bit of “coaching Kata” for mentoring.
